EXPERIENCES

Interviewer at Stockholm Stad | Juli 2024 – Juli 2024 (3 week period)

- My job was to collect information about residents' economical situation in Stockholm. The data was then later passed onto Stockholm Stad which will in turn be used for political purposes to provide improvements to the city and its people.

Private Coach at Allakando | April 2025 – July 2025

- During my time at Allakando, I was tasked with assisting students with particular struggles regarding their studies. I would meet them, either physically or online, and help them study specific subjects on a question-to-question basis. The goal was to aid students who may feel as if they're lacking, and my main task besides expanding their knowledge was to motivate them and ensure they have the capacity for more than they believe. I also helped with creating personalized study plans, homework, and overall comfort with private chatter.
